Work experience

Automation Developer, Check Point Software Technologies   **2016 - 2018**

Work closely with development team and write tests according to their requirements in order to maintain continuous production.
Environments in both Linux &Windows.

Education

BSc in Mathematics and Computer Science, Ariel University   **2014 - 2017**

- Final GPA: **91.3**
- Dean's Honor three years in a row

Courses included: Operation System, Data Structure, Algorithms and Computer Networking.

Psychometric exam grade: **726**.

Projects

Integrated encryption in compression | University Final Project

In this project I integrated encryption with LZW compression algorithm by using and modifying C++ open source projects while analyzing the data and drawing conclusions using Python & C scripts we wrote.

Fantasy board game | Final assignment in C++ course

In this project I practice Pair programming (an agile software development technique) and implemented the logic behind a fantasy board game – a hero need to go through the board while picking potions shields and weapon and encounter evil enemies.

Technical skills

Master language – java   Also familiar with – C, C++, SQL, spring, css, html, java script, Angular, Bootstrap

Languages

- English - Full professional proficiency.
- Hebrew – Native.
